KUBOTA POWER UNIT SPECIFICATIONS

Model:	D1703ME3BHYDESCP
HP Rating:	34.98 @ 2800 RPM
Radiator:	Mounted radiator, coolant recovery tank
Air Cleaner:	Mounted dry air cleaner, stainless steel manual air intake shutdown 6ft pull cable
Muffler:	Mounted low profile laydown muffler, spark arrestor
Fuel Filter:	Mounted spin on fuel filter assy
Mount Feet:	Structural steel mounting feet
Flywheel Power Take Off:	Hydraulic pump adaptor SAE 2B 7/8" 13T spline
Engine Controls:	12 volt F.W. Muprhy elctrical engine controls, weatherproof control panel, hi temp and low oil shutdown, oil pressure gauge, water temp gauge, magnetic switch, tach/hour meter, alternator light, key switch 4ft loomed wire harness, micro speed control cable
Accessories:	Stainless steel hardware, stableflex vibration isolators supplied loose, fueled, servcied and tested
Summary:	The open power units is assembled for hydraulic pump applications. It can be used for engine replacement or new application.
